

ABOUT MY SERVICES

My clients come away from their lounge experience looking beautiful - with hair that has been treated with excellence. They also feel beautiful because they, too, have been treated with respect through a spirit of excellence. After years of education and experience, this is my guarantee. I provide truly holistic care to my clients.

I assist my clients in cultivating inner and outer beauty!

DR. ENOLA PILLARD, DPC

TRICHOLOGIST

"Our hair is called our crowning glory. It displays how we see ourselves. Therefore, it is important that it is cared for properly."

DR. ENOLA PILLARD

Dr. Enola Pillard, DPC has been a passionate hairstylist for over 29 years. Through continued education in her industry, she became licensed as a Cosmetology Instructor, an educator, and obtained her Bachelor, Master's and Doctoral degrees in Cosmetology. She also became the CEO Ashanti Enterprises, LLC in 2017.

in 2017, Dr. Pillard began pursuing additional course work, as well, to become a Certified Trichologist, a Hair Replacement Specialist, and a Holistic Hair Practitioner. She is determined not only to beautify her clients' hair, but also help them to beautify their lives.

WHEN SHOULD YOU SEEK A TRICHOLOGIST?

Some of the most common issues that trichologists treat include:

- 01 Dandruff
- 02 Hair loss
- 03 Alopecia
- 04 Weak hair
- 05 Itchy scalp

WHAT IS A TRICHOLOGY?

Trichology is a paramedical science that studies and analyzes hair, hair loss, and scalp problems; the causes, effects, assessments, and treatments of diseases of the human hair and scalp.

The word originates from the Greek word *trikhos*, which means hair. Many view trichology as the link between [cosmetology](#) and [dermatology](#), where cosmetology involves beautifying while dermatology is the branch of medicine concerning the skin.

Trichology aims to understand the reason behind why someone may be experiencing hair loss in order to treat it. Since that involves both the hair and the skin beneath it, and since it can either be a health or cosmetic issue, this science links the two professions.
